

Kishore Kumar R

Computer Science Undergraduate | Aspiring Full-Stack Developer | Madurai, Tamil Nadu

Phone: +91 7010426313 | kishorekumarrs018@gmail.com, [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Computer Science and Engineering student with a strong foundation in software development and web technologies. Experienced in building real-world applications using Java, Python, and JavaScript, with hands-on knowledge of APIs and system design. Passionate about developing efficient and scalable solutions while continuously improving technical skills.

EDUCATION

Kalasalingam Academy of Research and Education, Krishnankovil BTech-CSE Cgpa-7.96	2022-2026
Dolphin matric higher secondary school, Madurai Passed 12 th Percentage-81.6%	2021-2022

SKILLS

- Programming Languages :Python, Java, C#, HTML, CSS, JavaScript, SQL
- Frameworks & Libraries :Flask, ASP.NET Core, React.js, Node.js, Express.js, Bootstrap, Entity Framework Core, Axios, Leaflet.js, TensorFlow.js, OpenCV
- Basic ML Skills :Classification, Feature Engineering, Model Evaluation
- Databases :MySQL, Firebase
- Tools & Platforms :Git, GitHub, npm, Linux
- Linguistic Languages :Tamil (Native), English (Proficient) , Hindi (Basic Proficiency)

PROJECTS

- **Medipath: An Intelligent Emergency Medical Service System with NLP and Real-Time Coordination** - [GitHub](#) | **Tech Stack:** ASP.NET Core, React.js, Flask, MySQL, Firebase, NLP, REST APIs, Leaflet.js, Entity Framework Core | **Description:** Developed a full-stack healthcare system using ASP.NET Core and React, integrating patients, hospitals, and ambulance services. Built backend workflows with Flask and managed data using MySQL with Entity Framework Core. Achieved ~92% accuracy with real-time routing under 2 seconds.
- **E-Bike Navigation with Parking Assistance** - [GitHub](#) | **Tech Stack:** JavaScript, Leaflet.js, TensorFlow.js, OpenRouteService API, OpenWeather API, Overpass API | **Description:** Developed a web-based e-bike navigation system with real-time routing, weather updates, and parking assistance. Integrated multiple APIs for accurate location-based insights and built interactive maps using Leaflet.js. Implemented real-time object detection using TensorFlow.js to identify nearby obstacles and provide safety alerts.
- **Real-Time Object Collision Detection with Telegram Alerts** - [GitHub](#) | **Tech Stack:** Python, OpenCV, Telegram Bot API | **Description:** Built a real-time collision detection system using OpenCV for object detection and risk analysis. Integrated Telegram Bot API for instant alert notifications on potential collisions. Optimized for fast processing and reliable performance in safety-critical environments.

ACHIEVEMENTS

- [Presented](#) and published a research paper titled “Medipath: An Intelligent Emergency Medical Service System with NLP and Real-Time Coordination” at APCIT-2025 (IEEE), indexed in [IEEE Xplore](#).
- [Finalist](#), IEEE Smart Kare Hackathon Grand Finale – National-level healthcare innovation hackathon organized by IEEE at Kalasalingam Academy of Research and Education, 2025.
- [Participant](#), IndusAI 24-Hours Hackathon 2025, organized by Shaastra at IIT Madras - January 2025.

CERTIFICATIONS

- [Python](#) by HackerRank, May 2025
- [Java](#) by HackerRank, May 2025
- [SQL](#) by HackerRank, August 2025
- [Keras & TensorFlow](#) by Scalar, March 2026
- [DATABASE MANAGEMENT SYSTEMS](#) by CodeChef, April 2024
